DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 8-17, drawn to an apparatus, classified in class 29, subclass 33M.
 - II. Claim 7, drawn to a wire harness supply method, classified in class 29, subclass 857.
 - III. Claims 19-20, drawn to a method for stacking housings, classified in class 29, subclass 872.
 - IIII. Claim 6, drawn to a housing holder unit, classified in class 439, subclass 775.
 - V. Claim 18, drawn to a wire harness, classified in class 174, subclass 117F.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups II-III and of Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as a charge coupled device that performs the correction function.
3. Inventions of Group II-III and of Group IIII-V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP §

Art Unit: 3729

806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as one that does not require a correction process.

4. Inventions of Group II and of Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Group II is fixed to an electronic device and Group III is connected to another electronic device to connect Groups II and III together for electrical communication.

5. Inventions of Group I and of Groups III-V are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product as claimed can be made by another and materially different apparatus such as a charge coupled device that performs the correction function.

6. Inventions of Group IIII and of Group V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Group IIII is fixed to an electronic device and Group V is connected to another electronic device to connect Groups IIII and V together for electrical communication.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or have acquired a separate

Art Unit: 3729

status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

8. Due to the complex nature of the restriction requirement, no telephone call was made to the attorney of record to request an oral election to the above requirement.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

10. **Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**
